## Key Features

- Optimized for Large Auditoriums: Ideal for screen channels in large venues with limited space behind the projection screen (47 cm depth).
- Bi-Amplification Ready: Designed for bi-amplification with an external active crossover at 400 Hz and a passive crossover at 1.7 kHz for the mid-high range.
- Enhanced Voice Spectrum: Features two 6.5" cone speakers and 90° x 30° constant dispersion horns to improve dialogue intelligibility.
- THX Approved: Meets rigorous THX standards, ensuring high-quality, professional cinema sound performance.

## Description

The K.C.S. S-7801 three-way speaker system is specifically designed for screen channels in large auditoriums.

With a depth of 47 cm, it is ideal for installations where space behind the projection screen is limited.

The bi-amplified system operates with an external active crossover set at 400 Hz, while a passive crossover cuts at 1.7 kHz between the mid and high ranges.

The bass section features a direct radiation cabinet with two 15" speakers, delivering powerful low-end sound.

The voice spectrum is reproduced by two 6.5" cone speakers and 90° x 30° constant dispersion horns, which enhance dialogue intelligibility compared to conventional two-way systems.

The high-frequency section includes a titanium diaphragm compression driver paired with a constant directivity horn for clear, precise high-end performance.

Additionally, the S-7801 system is THX approved, ensuring it meets the highest standards for cinema sound quality.
